

Fidget Computerware - Computing systems of the future - Now!

1 Helpdesk

Computer problems? Just call Fidget and we'll sort it! What's more, we'll give you honest advice and help in plain English, you won't hear any nerd speak here! (unless required).

We've got over 25 years experience so there's nothing we don't know, (all right, there might be the odd tricky one but we'll still crack it!)

Fed up of calling your ISP? Let us do battle on your behalf.

2 R&D

We thoroughly test our computing systems first - you won't be a guinea pig, we'll blow ourselves up so you don't have to! Our advice comes from testing and experience.

3 Communications & Monitoring

We keep an eye open for potential problems sometimes before you even know about them, from disk space to web servers we'll report as soon as there's a problem.

We provide remote help, updates and instant support. Making sure the communications are secure by encrypting them whether that's wireless, Lan or over the internet.

4 Security

We protect your system against naughty aliens (The Mekon or anything else!). Updates / antivirus are all kept up to date so your system is not vulnerable to attack.

Ensuring your environment is safe from the outside world, whether it be firewall, routing, network, mail or webserver we'll make sure it's "PCI compliant" if necessary.

5 Workshop

In an emergency our engineers will leap in to action, ready to fix problems on-site. We loan new equipment if needed and also carry out preventative maintenance.

All our systems are custom configured before delivery - no hours of updates before things are ready.

6 Admin

We do all the boring stuff; system record keeping, reminders for the renewing of vital services, certificates, domains, antivirus. Even a forgotten password? we'll sort it!

7 Bespoke development

Our boffins will configure your software, from Macros to complete systems and integrate all hardware, fitting it all together.

If your software doesn't do what you want, we'll make it so!

8 Training

We've been doing this for years so let us show you how.

We know all the tricks and tips. Our training is brilliant; simple but effective (and you won't need to do any exams!)

16 Hillbottom Road, High Wycombe, Bucks HP12 4HJ Telephone: 01494 448252
